

Phase 2 — Reading the Table

The full game rules and protocol are on the [SHOWDOWN guide](#). This page covers what phase 2 adds: table rules, and attempts made of several legs.

Table rules

Every match is played under one **table rule** — a modification to how the showdown is decided. It is fixed for the whole match and announced in `table_rule` on every request. Only the showdown changes: betting, forced bets, position and sizing are identical under every rule.

We are not telling you what the rules are, or how many there are.

Here is a rule that is **not** in play, so you know the shape of the thing:

Odd numbers beat even numbers; within each group, higher still wins.

That is an illustration of the *kind* of change a rule can make — nothing more. The real rules are not this one. Do not code against it.

table_rule is a codename

`table_rule` carries an opaque string — something like `chalcedony`, also not a real one. It identifies the ruleset without describing it.

The mapping is fixed for the whole event: the same codename always means the same ruleset, in every match, every attempt, and every later phase.

Read it on every request rather than assuming it carries over. The same number can be a monster under one rule and worthless under another.

Legs

An attempt is four **legs** played back to back. Each leg is a complete match with fresh 200-chip stacks and its own table rule — `hand_number` restarts at 1 and every `chip_delta` restarts at 0. `leg_number` and `total_legs` tell you where you are; both

are `null` in a single-match phase.

`recent_hands` does not carry across legs. It resets when a new leg starts.

Phase 2: Reading the Table — 400 pts

Four legs, **40 hands** each, a different table rule on each.

The same opponent plays all four legs, under the same name, and plays the same way throughout. Their name is drawn fresh each attempt, so it never means anything.

The leg order and each leg's rule are identical on every retry — only the cards change.

Per leg: chip delta $\geq +25 \rightarrow 100$ points. Points accumulate per leg; you don't need all four to score. All four is the full **400**.

Glossary additions

Terms added to the [SHOWDOWN guide's glossary](#):

Term	Meaning
Leg	One complete match inside a multi-match attempt. Fresh stacks, its own rule, its own <code>recent_hands</code> .
Table rule (<code>table_rule</code>)	The showdown ruleset a match is played under. Announced on every request as a codename, and never changes mid-match.
Codename	The opaque string <code>table_rule</code> carries. It identifies a ruleset without describing it; the same codename always means the same ruleset.
